

WG4 meeting – September 10, 2018

Name of participants :

- Eda Merisalu
- Claudio Colosio
- Bozena Sera
- Frederica Masci
- Katerina Pavičević
- Ad de Rooij
- Aurélie Berthet

News :

- 2 conferences where the presentations were made on the article (eurostat and statistics)
- 1 article will be submitted on November
- Organized a seminar in the next conference

Claudio:

- Trends on effectiveness of intervention and periods of intervention
- Not only on literature, but select some diseases and check the trends
- EU is collected data from 2015 to now in Eurostat, we found data in this database
- Air inhalation (asthma) is an interested topic as well contact dermatitis, musculo-skeletal diseases. These are only work diseases.
- Consortium (modernet) will have a meeting in Slovakia on February

Plan for the review:

- 1) A literature research on this topic (1)
- 2) Collect data for 2012-2015 on selected occupational diseases to put in the table and check for the trend. Based our selection on the article of Colosio et al. (2017) "Workers' health surveillance: implementation of the Directive 89/391/EEC in Europe"

Identify sources and specific articles

Sources identified: stata, comments on agricultural, recommendations

Managing database: work (Eda, Frederica, Katerina, Ad, Bozena) accidents and work diseases (Claudio, Aurélie),

Groupe 1: Statistics – works accidents what are the quality?

- Terminology has to be determined to be sure that we all used the same terminology.

To collect data, a questionnaire based on the convention 129 from ILO may be used.

Agenda:

Prepare all the questions to complete a good questionnaire – End: November 1st, 2018

Diffuse the questionnaire to all Cost participants – Ask for an answer for the end of the year (December 2018)

Research articles in literature for review and critical articles on accidents at work + on disease: December 2018

Ad supervise WA literature analysis

Claudio supervise OD literature analysis

Eda is responsible and take care of the questionnaire

If questionnaires are completed at the end of December, in January, a table of comparable data will be created (Eurostata vs national data). A separate paper may be write depending on the quality of the results.
